+254710913737 Nairobi, Kenya kiariebrian8@gmail.com

SUMMARY

A collaborative and quick-learning individual with a Bachelor of Arts in Information Technology, I bring a strong drive to excel in full-stack development. My foundational understanding of web technologies, coupled with practical experience in team-oriented environments, positions me to readily contribute to dynamic projects.

Having recently completed the PLP Software Engineering program, I am eager to apply my comprehensive skills in both front-end and back-end development within an intern role. My proactive approach and effective communication skills will be invaluable in contributing to team success and rapidly enhancing my full-stack capabilities.

PROFESSIONAL EXPERIENCE

July 2024 - To January 2025

Internship at Inrank Company & Fanasoft

During my internship, I engaged in a variety of roles that perfected my skills in graphic design, customer support, social media management, content management, video editing, and programming. My key duties and responsibilities included:

Front-End Development

- Contributed to front-end development using HTML, CSS, and JavaScript to enhance user interface elements and improve website responsiveness. This involved structuring web pages, applying styling, and implementing interactive elements.
- UI/UX Implementation: Translated UI/UX design principles into functional and visually appealing web interfaces, focusing on user experience and accessibility.

Back-End Development

- Assisted with back-end programming tasks, gaining experience in server-side logic and database interactions. This included participating in website updates and basic programming tasks.
- Database Management: Assisted in managing databases, including writing SQL queries and ensuring data integrity.

Website Enhancement

- Participated in website updates and programming tasks to enhance user experience and site functionality. This required collaborating with colleagues to ensure seamless integration and optimal performance.
- Performance Optimization: Contributed to improving website performance by optimizing code and reducing page load times.

Development Collaboration

- Collaborated with the team to understand project requirements and support the full development lifecycle. This involved working with designers and developers and participating in code reviews.
- Agile Methodologies: Gained experience working in an Agile development environment, participating in sprint planning and daily stand-ups.

Version Control

- Implemented Git and GitHub for version control, facilitating code management and team collaboration. This included utilizing Git for local tracking and GitHub for remote repository hosting.
- Branching Strategies: Implemented Git branching strategies to manage code changes and releases.

SKILLS

Programming Languages:

- Python
- PHP
- CSS
- JavaScript
- HTML

Full-Stack Technologies:

- MERN Stack (MongoDB, Express.js, React, Node.js)

Front-End Technologies:

- Responsive Design
- UI/UX Principles
- Web Accessibility
- React

Back-End Technologies:

- Server-Side Logic
- Database Concepts
- API Interaction
- Node.js
- MongoDB

Content Management Systems:

- Wordpress

Version Control;

- Git
- GitHub
- Branching Strategies

Other Skills

- Problem-Solving
- Teamwork
- Communication
- Adaptability

EDUCATION

Software Engineering (Full Stack Mern Tech)

Power Learn Project
Certificate

February 2025 to July 2025

Bachelor Of Arts With IT

Maseno University
Second Class upper.

November 2020 To May 2024

Kenya Certificate Of Secondary Education

Mururia Boys High School

February 2016 to November 2019

Design Courses Undertaken

Advanced

- Graphic Design
- Adobe Illustrator Fundamentals
- Adobe Photoshop Essentials
- Video Editing with Adobe Premiere Pro
- UI/UX Design Principles
- Brand Identity Development
